Summary

Senior software engineer with 6+ years building Python backend platforms and applied AI solutions across healthcare and logistics. Own distributed services, APIs, event-driven workflows, and LLM integrations from design through production. Bring hands-on delivery, technical leadership, security, and Kubernetes experience to senior backend and applied AI engineering roles.

Experience

Innovaccer Jul 2023 – Present
SDE-III / Lead Backend Engineer *Abu Dhabi, UAE*

- Lead backend delivery for multi-tenant healthcare products from requirements and architecture through production; collaborate with product teams, lead technical reviews, and mentor engineers.
- Designed Epic, Cerner, and Athena EHR integrations using REST APIs, polling, and webhooks; coordinated write sequencing, retries, and reprocessing to maintain consistent records.
- Built configurable Python FHIR services using clean/hexagonal architecture for a capability requested by 50+ clients; reduced p90 latency from approximately 10 seconds to under 500 ms and average latency below 100 ms.
- Built Kafka consumers and Celery/Redis workflows with idempotency and retries; increased Python throughput from approximately 20–30 to 1,200 requests per minute per pod through threading and runtime/server tuning.
- Participated in on-call support and owned the team's client support-ticket management and coordinated its handover; investigated production incidents and root causes using New Relic and Kibana.
- Manage service Helm charts and Kubernetes resource configuration; tune HPAs and KEDA autoscaling, and deliver releases through ArgoCD across Azure/AWS environments.
- Implemented UAM authentication and permissions, configured Kafka ACLs, and maintained shared libraries supporting common service functionality.
- Worked on email/PDF intake using OCR and model-based extraction, calling EMPI services with MRN/name/DOB to match patients; confidence-based matches attach documents, while uncertain cases go to a human-review dashboard.
- Created and managed InnoGPT for 6+ months alongside core deliveries: Azure OpenAI-powered VS Code/PyCharm plugins used by 300 engineers, with onboarding and adoption telemetry recording nearly 100,000 total requests. Use Claude Code daily with custom skills for monitoring and feature implementation.

Innovaccer Jun 2021 – Jun 2023
Software Development Engineer II *Noida, India*

- Delivered Python/Django services and REST APIs for InCare care coordination and patient engagement; owned implementation, testing, releases, and maintenance.
- Built care-management workflows including CCM time tracking and billing, Pool Worklist, eligibility, care protocols, and care plans using reusable services and asynchronous processing.

Delhivery Feb 2020 – Jun 2021
Developer Engineer *Goa, India*

- Designed an action-based truck lifecycle architecture, enabling UI configuration of business rules and permissions without code deployments.
- Integrated third-party APIs for invoicing, receivables, vendor proof-of-delivery collection, and invoice booking.
- Worked on an advance-payment flow integrating a payment gateway; used Amazon Kinesis payment events to drive trip-state transitions from advance pending to cleared and trip started.

Technical Skills

Backend & Architecture: Python, Django, FastAPI, Java, Go (personal projects), Threading, Microservices, Distributed Systems, Multi-tenant SaaS
APIs & Reliability: REST APIs, Async Workflows, Idempotency, Retries, On-call / RCA, UAM / Permissions, Kafka ACLs
Cloud & Delivery: Azure, AWS, Lambda, Docker, Kubernetes, Helm, HPA, KEDA, ArgoCD / GitOps, CI/CD, New Relic, Kibana
Data & Messaging: SQL, PostgreSQL, Snowflake, MongoDB, DynamoDB, Redis / Caching, Elasticsearch, Kafka, Celery, Amazon Kinesis
Applied AI: Azure OpenAI, RAG / Vector Search, LangChain, LangGraph, LlamaIndex, Tool Calling, Agentic Workflows, Evals, Guardrails, Structured Outputs, Human Review, Claude Code

Personal Projects & Technical Writing

Redis CLI (RESP), custom thread pool, consistent hashing, Bloom filter, and Count-Min Sketch implementations. Write about distributed systems, backend performance, and production AI on Medium.

Education

Lovely Professional University Jul 2020
B.Tech in Computer Science – CGPA: 8.99/10 *Jalandhar, Punjab*

Achievements & Certifications

Achievements: Champion Award, Innovaccer (2021, 2023, 2025); ACM ICPC Asia Gwalior-Pune Regionalist (2019); InterviewBit Academy Top 300/10K (2019); CodeChef 4-Star Rating
Certifications: InterviewBit Academy Program; Data Visualisation (Coursera); Android Basics (Google Challenge Scholarship)
